EARTH ACTION PLAN

Why an Earth Action Plan?

Organisations are under increasing pressure to measure, reduce and rebalance carbon emissions in line with global targets and other stakeholder requirements. Our Pause People Earth Reduction Guide will support you to simply and effectively meet these requirements.

Step by Step :

Three simple steps.

Step 1 | We Measure Your Carbon Footprint

Before rushing to the solutions, first we help you measure and understand the complete carbon footprint of your business. We provide this information to you in a clear and concise report called a Carbon Footprint Report. We support you and your Team to understand your high impact areas so that together we can focus action to achieve reductions.

Step 2 | We Create Your Carbon Reduction Guide

Together we will set your net zero aligned carbon reduction targets. We set out what actions you could take to reduce and rebalance your carbon emissions towards achieving net zero emissions. We provide this information to you in a simple and practical Carbon Reduction Guide. Supporting you to measure, reduce, rebalance, and track your emissions over time.

Step 3 | We Help You Take Action

Together we will collaborate to explore an optimal route forward. We connect you with our network of professional, trusted and like-minded individuals who share your intention to rebalance energy and carbon and create a more ethical, sustainable and abundant future. Our Pause People Collective Network will take each element of your Earth Action Plan and support you in bringing them to life. Together we will create the momentum, empowering you and your Team to achieve your Earth Action Plan.

We Check-In

Checking in every now and then is as important as taking a moment to pause. We frequently check-in on your progress towards implementing your Earth Action Plan and review your progress towards your carbon reduction targets. We collectively communicate and share your achievements with others. This is a gentle reminder that we are in this together, every step of the way.

What will you get?

You will receive the following :

- Carbon Footprint Report
- Carbon Reduction Guide
- Certificate and Badge

Solution Summary

We create a bespoke plan to help you measure, reduce and rebalance your carbon footprint and environmental impact.

Your Earth Action Plan

- It is aligned with global carbon footprint reporting standards.
- It is aligned with the climate science (net zero) reduction pathways.
- It is recognised and accredited by the United Nations.
- It is simple and streamlined.
- It can be annually updated to track your reduction progress over time.
